

SAHANI

Reference No: 1205

Age : 21

SAMPLE COLLECTED BY

Lab Assist. Shan Perera

Ref. by. Dr.Shamath Fernando

LIPID PROFILE

| Investigation | Result | | Reference Value | Unit |
|-------------------|--------|--------|-----------------|--------|
| TOTAL CHOLESTEROL | 3.0 | Normal | 2.9 -5.2 | mmol/L |
| TRYGLYCERIDES | 0.6 | Normal | 0.4 -1.7 | mmol/L |
| HDL-CHOLESTEROL | 1.4 | Normal | 0.9 -2.3 | mmol/L |

NOTES

- Total cholesterol levels should ideally be below [value] mmol/L.
- HDL cholesterol is often referred to as "good" cholesterol, and higher levels are generally desirable.
- Elevated triglyceride levels may indicate an increased risk of cardiovascular disease.

Thank You, Have a nice day!
